

## METHOD OF TRANSFERRING DATA BEING STORED IN A DATABASE

### Abstract of the Disclosure

A method of sending data stored in a database from a sender to a recipient, which are mobile phone users, in relationship with a manager that defines a managing software application, wherein database and the manager are in connection with a website, involves entering into a connection between the sender and the manager. The sender enters into the connection with the manager and provides sender identification to the manager. Further, the method involves transferring an identifier to the manager, wherein the sender transfers the identifier that comprises at least a recipient's mobile phone number. Further, the method involves associating an e-mail address or a URL address with the identifier by the manager.
